DETAILED ACTION

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

No reference nor combination of references was found which teaches a transfer case including a range unit, a dog clutch operable in two range positions, a mode clutch with a clutch pack and pressure plate moveable between two mode positions, and an actuation mechanism for coordinating movement of the dog clutch and pressure plate including an input gear, and output gear, and a motor driving the input gear, wherein the output gear moves the dog clutch and the pressure plate, and the output gear is rotatable through three ranges variably moving or maintaining the positions of the dog clutch and pressure plate, as required by claims 1 and 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent 5,199,325 (Reuter et al.) April 1993 - discloses a transfer case including a range unit with a dog clutch and a mode clutch with a clutch pack and a pressure plate. The dog clutch and pressure plate are each moved by a spiral gear train driven by a motor.

Art Unit: 3681

U. S. Patent 6,645,109 (Williams et al.) November 2003 and U. S. Patent 6,824,487 (Williams et al.) November 2004 each disclose a transfer case with a differential, a range unit, a dog clutch operable in two ranges, a mode clutch with a clutch pack and pressure plate, and an actuation mechanism for coordinating movement of the dog clutch and pressure plate, including a geartrain with an input gear and output gear and a motor driving the input gear. The output gear moves the pressure plate, but the motor output shaft moves the dog clutch independently of the geartrain.
